Operative Report

Physician Name: Dr Bernard Landry

Patient Name _____ **Date** _____

Pre-Op Diagnosis _____

Post-Op Diagnosis _____

Procedure: Facet Nerve Median Branch Block - Cervical

Levels _____ Bilateral Right Left

Complications: _____

Procedure in Detail: The patient was positioned in a prone position. Sterile betadine scrub was accomplished on the skin overlying the back. Sterile drape was applied and 1% Lidocaine and a # 25 gauge needle was used to raise a skin wheal over facet joints. A # 23 gauge spinal needle was used to locate each of these facet joints with fluoroscopic guidance. The patient tolerated the procedure well and will be followed up in the recovery area. Patient was tested in the postoperative recovery area when patient was fully awake.
